

Climate Training Workshop

Dear Oklahoma and Texas tribal environmental professionals and related staff,

The Southern Climate Impacts Planning Program in conjunction with the South Central Climate Science Center is planning climate training workshops later this summer. The two day workshops will run during the workday. The purpose of the workshop is to educate on the basics of climate science and to assist tribes in addressing climate science needs. This includes information on weather and climate hazards, climate data tools, and discussions on climate vulnerability and adaptation.

Please save the date for the workshop most convenient to your schedule.

August 14 & 15 in Wyandotte, OK at the Eastern Shawnee complex

August 27 & 28 in Ft. Cobb, OK at the Caddo Kiowa Technology Center

September 10 & 11 in Durant, OK at the Choctaw Resort

September 18 & 19 in Stroud, OK at the Sac and Fox complex

There will be more information to follow and an invitation to register in coming months.

Thank you!

Alek Krautmann & Rachel Riley
